2007 GENERAL DOCUMENTATION

SYNOPSIS

Pages 2 to 3 : Consult the www.archiliste.fr data base

Pages 4 to 8: Select the Prescriber data bases

Pages 9 : Rates

Pages 10&11 : Insert advertising in our questionnaire mailings sent to 34,000
prescribers and take part in our e-newsletters

Page 12 : References

Person in charge: Bertrand VIELLARD and Olivier SECHAN

Consult the www.archiliste.fr data base

Over the last twenty years, Archiliste has built a unique data base of information on building prescription. This data base goes beyond offering you raw information on architecture firms, interior designers, economists, engineering and design departments or building project superintendents; instead, it offers you classification by order of economic importance and by specialization.

It is based on the 71,000 requests for building permits granted to architects and workers, and benefits from regular and exhaustive investigations by mail and telephone, and synchronization with data bases of companies registered in the telephone book and in various professional directories. To consult this database, connect to www.archiliste.fr.

You will have free access to the Rhone region by typing 7HK69 in the heading "Subscribers." Access to all of France is free for Archiliste customers. The site does not allow addresses to be extracted, possible by purchase of the Archiliste files in Excel format. Our updates are done on a daily basis. Any marketing we do entails special study to better meet your needs.

Other information available on www.archiliste.fr

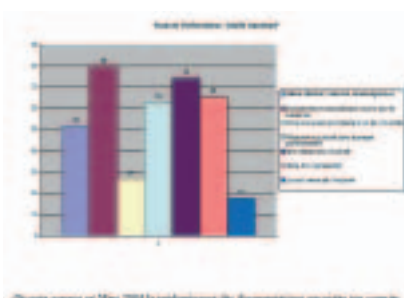

Christian Fauconnet's "La Prescription dans le Bâtiment en France" can be downloaded free of charge.

We think that you'll enjoy taking a look at this fascinating subject, covered in 40 pages by an author who has a long background of field experience leading renowned regulation teams.

The results of our March 2006 investigation on the various sources of information of the building prescribers can be downloaded free of charge.

This 55 page study, carried out for the second consecutive year and based on 764 returned questionnaires, indicates the level of interest for: Trade shows, documentation sent via mail, spontaneous E mailings sent by companies, drafting and publicity in professional media outlets, collective mailings, commercial Internet sites, visits by a representative, Internet sites, and industry newspapers.

Archiliste has also surveyed people on the means of communication they use when they look for a product, as well as which magazines they read regularly. You can also visit www.archiliste.fr the files of 5,154 prescribers who have chosen to be listed on our site free of charge. This includes direct links to 1.130 personal Web sites

Select the prescribers data bases Architects and experts in architecture

By analyzing our data base of years of information, we can provide you with firms that correspond to market shares and new buildings of all types of construction more than 1,000 sq. meters large. Our pool of architects is based on the analysis of 70,500 building permits issued in the last 20 years, information from workers, and the responses to eleven questionnaire mailings to professionals practicing in the past six years. We can also offer you sorting by types of construction and combine criteria.

We can send documentation to:

- *the 5,763 firms responsible for 69% buildings larger than 1,000 square meters built in France*
- *or to the 19,643 firms for 100% potential results.*

HERE'S HOW WE MADE OUR SELECTION:

- *A reduced selection of all types of construction across France: 5,763 architecture firms are responsible for 69% of construction of all types larger than 1,000 sq. meters.*
- *We choose the most largest firms that, between 1982 and 1985, constructed buildings of all types larger than 20,000 sq. meters, or larger than 5000 sq. meters from 1988 to 2005.*
- *We also retained the contact info of all other firms with at least three paid employees.*

Archiliste's main selections: For Architects

ARCHITECTS OF ALL TYPES OF CONSTRUCTION AT LEAST 1,000 m²

- Option 1:** A reduced (thus optimized) selection of all types of constructions for all of France: 5,763 architecture firms for 69% of construction.
- Option 2:** Reduced selection of all types of constructions for all of France: 9,200 architecture firms for 78% of construction.
- Option 3:** All Archiliste architects: 10,606 architecture firms for 82% of construction.
- Option 4:** All the architects in France: 19,643 architecture firms for 100% of construction.

ARCHITECTS OF TERTIARY BUILDINGS AT LEAST 1.000 m²

By tertiary buildings, we mean public buildings, such as schools, town halls, offices, businesses, etc. In other words, all constructions except for residential and industrial structures.

- Option 1:** Reduced selection of tertiary buildings in France: 6,711 architecture firms for 75% of constructions.
- Option 2:** Tertiary selection for all of France: 8,337 architecture firms for 77% of constructions.
- Option 3:** All the Archiliste architects: 10,604 firms for 82% of construction.
- Option 4:** All the architects in France: 19,643 architecture firms for 100% of construction.

ARCHITECTS OF INDUSTRIAL-TYPE BUILDINGS AT LEAST 1,000 m²

For example: Agricultural buildings, factories, storage buildings

- Option 1:** Reduced selection of industrial buildings for all of France: 4,713 firms for 61% of constructions.
- Option 2:** Selection of industrial buildings for all of France: 7,089 firms for 68% of constructions.
- Option 3:** All Archiliste architects: 10,606 agencies for 79% of construction.
- Option 4:** All the architects in France: 19,643 architecture agencies for 100% of constructions

ARCHITECTS OF RESIDENCES AT LEAST 1.000 M²

- Option 1:** Reduced housing selection for all of France: 6,432 architecture firms for 74% of construction.
- Option 2:** Housing selection for all of France: 7,459 architecture firms for 76% of constructions.
- Option 3:** All Archiliste architects: 10,606 firms for 81% of construction.
- Option 4:** All the architects in France: 19,643 architecture firms for 100% of constructions.

On request we'll be happy to provide you with a duplicate file of firms that build tertiary and industrial-type buildings, approximately 60% of companies on the market for these types of construction.

Created 19 years ago by UNSFA, the Regulation Club is a tool for architects and building industrialists working in regulation. Whether professional, event-driven or institutional, its meetings aim to support and develop exchange:

- For architects: Technological and regulation intelligence, knowledge of constraints and costs of recommended solutions.
- For industrialists: Launch of new technologies, specificities, development of notoriety, visibility.

For more information contact Esther PINABEL at + 33(0)1 40 26 04 04 or 06 23 18 50 85

clubprescrire@clubprescrire.com

... for the Technical Research Department (TRD) and building consulting engineers,

Since 1996, we have carried out nine exhaustive surveys of professional architects to offer you selections classified by specializations.

TRD General, jack of all trades: 1,429 companies.

TRD Heating, ventilation, air conditioning, plumbing and sanitary installations, thermal, energy: 717 companies.

TRD Low-current and electrical equipment: 569 companies.

TRD Metal frame, reinforcement, wood frame: 487 companies.

TRD Foundations, masonry, reinforced or pre-stressed concrete, roofing: 583 companies.

TRD Acoustic: 92 companies.

TRD Other specializations: Works of art, operation engineering, soil tests, geology, experimentation, geothermics, asbestos removal: 395 companies.

TRD field of unspecified skills: 3,266 TRD and building consulting engineers of which at least 75% work alone

We can provide cross selections. For example, we could select all the general TRD practitioners who have at least three paid employees. We could choose low-current and electrical technical research departments regardless of how many employees they have.

Distribution by manpower for all TRD and building consulting engineers

| | Number of companies |
|--|---------------------|
| 1 person | 1267 |
| 2 persons | 800 |
| 3 to 5 persons | 888 |
| 6 to 9 persons | 428 |
| 10 to 19 persons | 319 |
| 20 to 49 persons | 211 |
| 50 to 99 persons | 57 |
| 100 to 200 persons | 42 |
| More than 200 persons | 46 |
| Unknown manpower: | 2465 |
| <i>(75% are one-person businesses)</i> | |
| TOTAL | 6523 |

..... for building economists,

What role do building economists play in regulating products in the building industry?

Building economists are essential collaborators for most building industrialists. They play a considerable role in regulating products and processes because they write technical specifications to find the best total cost ratio without sacrificing quality. They work:

- Either directly for companies (especially in cases of economists working alone and often as the only consultant for the selection of products on small building sites);
- Or as part of design teams with other project managers or as assistants to building owners on important projects.

In terms of building sites, building economists intervene as much on individual residences (where they can be the only regulations officer) as on commercial buildings several thousands of square meters large (where they work as part of a design team with a particular interest regarding the building industrialist's offer).

They contribute to decision about structure (particularly floors, walls, roofs) and once the heavy work is complete, building economists help make decisions about insulation, sealing, closures and finishing touches and, to a lesser extent, about energy, fluids, washroom facilities and heating.

Our data base offers a tool for better communicating with the profession:

Our data base is exhaustive and compares three files: Members of Untec, professionals registered in the professional pages of telephone book, and professionals qualified by OPQTECC over several years). We carried out nine exhaustive investigations of the profession.

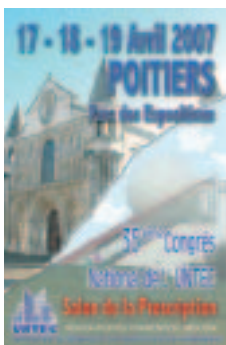

► **Very reduced selection: 1.327 addresses**

UNTEC members qualified by OPQTECC and working as a professionals, economists employing at least two salaried workers (only one interlocutor per structure) or workers present on www.archiliste.fr.

► **Reduced selection: 2.485 addresses**

of members of UNTEC, the profession's trade union, organizes its 35th congress and Regulation Trade Show from April 17- 19, 2007, in Poitiers.

OPQTECC recognizes some training sessions in building economy.

For more information: Untec, Blandine Souket-Basiège
Tel.: + 33(0) 1 45 61 46 83 bsb@untec.com

... interior designers and important decorators,

Since 2000, we carried out an exhaustive telephone survey of all the players in this profession (at least three calls per company) and nine questionnaire mailings.

“Interior designer” is a well-guarded title for certain professionals, which is why we have introduced the concept of “important decorators.” Interior designers tend to particularly defend the products they prescribe.

- ▶ **Very reduced selection of 1,537 firms:** At least three paid employees or members of FNSAI or UNAID, or who have been practicing at the same address since at least 1996, or are present on www.archiliste.fr
- ▶ **Reduced selection of 2,807 firms**

Interior designers are often highly educated: Among the 1,008 companies that mentioned training, we note that 29% of their employees have a diploma in architecture, 21% are “Art Deco,” 19% “Boullé School,” 15% “Fine Arts,” 7% “Camondo School, and 16% of architects have other educational backgrounds.

Types of construction sites: Interior designers work in residential housing (84%), collective spaces and offices (84%), stores and businesses (79%), and hotels and restaurants (71%). Other types of construction sites account for less than half: Exhibition booths (42%), other various constructions (28%), palaces and castles (27%), Hospitals (24%), various, except BTP (19%). (Data base: 929 respondents). Zone of activity: 34% of interior designers are ready to work in any country, while 47% prefer to stay in France, and another 19% want to stay in their region.

... primary building owners

The state's building services and local authorities: 322 addresses

Departmental directors of equipment, regional managers of equipment, directors of departmental services of architecture, directors of the engineering departments in general councils, directors of the engineering departments in various regions.

Technical Directors of the primary organizations for public housing

506 Technical Directors (name index) of the principal public housing organizations. They are directors for new works or directors of restoration.

Primary promoters manufacturers:

325 of the most important promoters manufacturers, name index: 90%, telephone: 99%, faxes: 99%.

Manufacturers of individual houses.

Our collaborator, Charon Marketing, carries out an exhaustive analysis annually of the offer and demand of individual houses. Total selection: 3,040 addresses; reduced selection, at least 20 houses per annum: 935 addresses.

Technical directors of cities of more than 5,000 residents

Based on 1,925 cities of more than 5,000 residents in France. Population indicated on each card. Names of 1,789 technical directors. 962 cities have more than 10,000 residents.

CNIL registration (Commission Nationale Informatique et Libertés).

All the Archiliste data bases are registered with the CNIL in particular under the numbers 244005 (Architects) 435741 (TRD), 255869 (Building economists).

2007 RATES

RENTAL AND SALE OF ADDRESSES FOR MULTIPLE USE:

There is a technical expense of 150€ (before taxes) per order for all Archiliste files.

Rental : (one use only): 0.16€ (before taxes) per address.

Sale : (multiple use): 0.40€ (before taxes) per address. Free updates for one year. Available upon request.

Rental of fax numbers: 0.05€ (before taxes) per fax delivered in the case of a mailing on the entire Archiliste data base. In parts, the rate is 0.08 (before taxes) per fax delivered.

Volume discounts:

From 5,000 to 10,000 addresses: - 20%

From 10,000 to 15,000 addresses: - 25%

More than 15,000 addresses: - 40%

The file for manufacturers of individual houses (3,110 companies) is available for 700€ (before taxes).

The selection of the top 935 manufacturers is available for 480€ (before taxes).

Lead time: In general, products are sent the same day by e-mail in Excel format. Refund for inaccurate addresses: 0.40€ (before taxes) per inaccurate address, provided that the file is less than one month old at the time of mailing and that the inaccurate address reaches us within sixty days of the mailing.

PUBLICITY INSERT IN OUR QUESTIONNAIRE MAILINGS:

For 34,119 mailings, a one-sided, four-coloured page included in a 12-page document, printed, folded, addressed and stamped, and followed up by e-mail to 35,000 subscribers: 4,000€ (before taxes).

Demi-page : 2.200 € HT

Half-page: 2,200 €(before taxes)

Insertion of documentation in our questionnaire mailings: 0.18 € (before taxes) for documents A4 size on 80g paper, selection by trades.

Subscription for consultation of the Archiliste data base on www.archiliste.fr 150 €
(before taxes) per year. Free for all Archiliste customers.

VAT: 19.6%. Free of port.

INSERT ADVERTIZING IN OUR QUESTIONNAIRE MAILINGS

*Archiliste sends out questionnaires four times a year
to these prescribers:*

| | |
|---|------------------------|
| <u>Architecture firms:</u> | 20,716 mailings |
| <u>Engineering and design departments:</u> | 6,511 mailings |
| <u>Interior designers:</u> | 3,128 mailings |
| <u>Building project managers:</u> | 1,857 mailings |
| <u>Building economists:</u> | 2.447mailings |
| Total: | 34,119 mailings |

The questionnaire enables prescribers to register their contact information free of charge on www.archiliste.fr and attach images and texts to illustrate their achievements.

- On the back of each individualized questionnaire is a documentation service. The mailing is sent in an A4 envelope.
- Each mailing comes with a 12-page booklet intended to showcase your offers, sent in an A4 envelope and printed in 4 colours
- If you do not wish to communicate with all prescribers, we can insert your document into our quarterly mailing aimed at the profession of your choice.
- Here's an opportunity to unveil your products to prescribers at reasonable cost and in an environment which interests them: 4,300 prescribers have already returned their questionnaire to be included on our site. The site visited by approximately 50,000 different visitors every year.
- Each mailing is followed by a follow-up letter sent by E-mail to 20,000 prescribers in collaboration with tiactu.com

References from our customers: *They trust us, and we thank them.*
